Hey Kimi – just worked down to this comment we got from industry:

The proposed draft permit is fundamentally flawed because it is based on speculation about potentially existing but completely unobserved and unproven effects rather than “the best available peer-reviewed science and economics.” Accordingly, many of the proposed permit conditions would unnecessarily burden the recovery of uranium essential to the use of nuclear energy in the United States by curtailing and imposing significant costs on the permitting and operation of uranium ISR projects essential to the utilization of nuclear energy resources. The imposition of such requirements contravenes the essence of energy and regulatory policies embedded in Executive Order 13783 “Promoting Energy Independence and Economic Growth” (March 28, 2017); Executive Order 13777 “Enforcing the Regulatory Reform Agenda” (February 24, 2017); and Executive Order 13771 “Reducing Regulation and Controlling Regulatory Costs” (January 30, 2017).380

Ex. 5 AC/DP

Thanks! Lucita
